I design, build and **operate complete web applications end-to-end** — REST API development, responsive frontends, AI integration (OpenAI), CI/CD deployment and GDPR-compliant data handling. Shipped **Nelurio**, a multilingual AI-powered study platform, live in production. Seeking a **Werkstudent / Internship** in software development (Rhein-Main).

KEY PROJECT — NELURIO · AI STUDY PLATFORM (2026, SOLO, PRODUCTION)

Full-stack SaaS application — nelurio.duckdns.org

- **Backend (Go):** REST API, PostgreSQL, session authentication, CSRF protection, rate limiting, RBAC admin console, automated database migrations.
- **Frontend (React 19 + TypeScript):** responsive PWA, installable service worker with offline support, internationalization (i18n) for 10 languages incl. RTL layouts.
- **AI integration (OpenAI API):** automated lesson summarization, retrieval-based tutoring with source citations, flashcard & quiz generation with deduplication.
- **Spaced repetition engine:** automated review scheduling (+1 to +30 days), user performance feedback loops, learning analytics.
- **DevOps & Security:** Linux VPS administration, Caddy reverse proxy with automatic TLS, GitHub Actions CI/CD, GDPR-compliant data deletion workflows.
