

I design, build and **operate complete products end-to-end**. Shipped **Nelurio**, a multilingual AI study platform, live in production with real beta users. Looking for a Werkstudent / Praktikum in software development (Rhein-Main).

KEY PROJECT — NELURIO (2026, SOLO, PRODUCTION)

AI study assistant for university students — nelurio.duckdns.org

- **Go backend:** modular monolith (chi), PostgreSQL, cookie sessions, CSRF, rate limiting, RBAC admin, 8 auto-applied migrations.
- **React 19 + TypeScript frontend:** Vite monorepo (web + admin), installable PWA, network-first service worker, full RTL, 10 locales.
- **AI pipeline:** OpenAI Responses API with mock fallback — lesson analysis, grounded tutor with citations, flashcard/quiz extraction with dedup.
- **Spaced repetition:** +1..+30 day scheduling, recall feedback, day-history locking. **Region-aware i18n:** Solar-Hijri (Iran) / Gregorian (EU) calendars.
- **DevOps & GDPR:** Oracle VPS, Caddy auto-TLS, GitHub Actions CI, cascade account deletion, privacy-request workflow.

FURTHER PROJECTS

NexDeutsch — German vocabulary platform

Spaced practice for German learners; predecessor of Nelurio's review engine. Rework in progress.

Washhalle App — car-wash operations

Real customer, real constraints: daily operations and tracking for a working car-wash.

Saad Tattoo — studio website (Wix + AI design)

Booking-focused client website, concept to launch.
saadtattoo.de

TECH STACK

EDUCATION & LANGUAGES

BWL Student — Hochschule RheinMain, Wiesbaden

German B2/C1 · **English** professional · **Persian** native

Availability: ~20 h/week (semester), full-time in breaks
